# РЕШЕНИЯ ПО ОБЕСПЕЧЕНИЮ ВИДИМОСТИ СЕТЕЙ

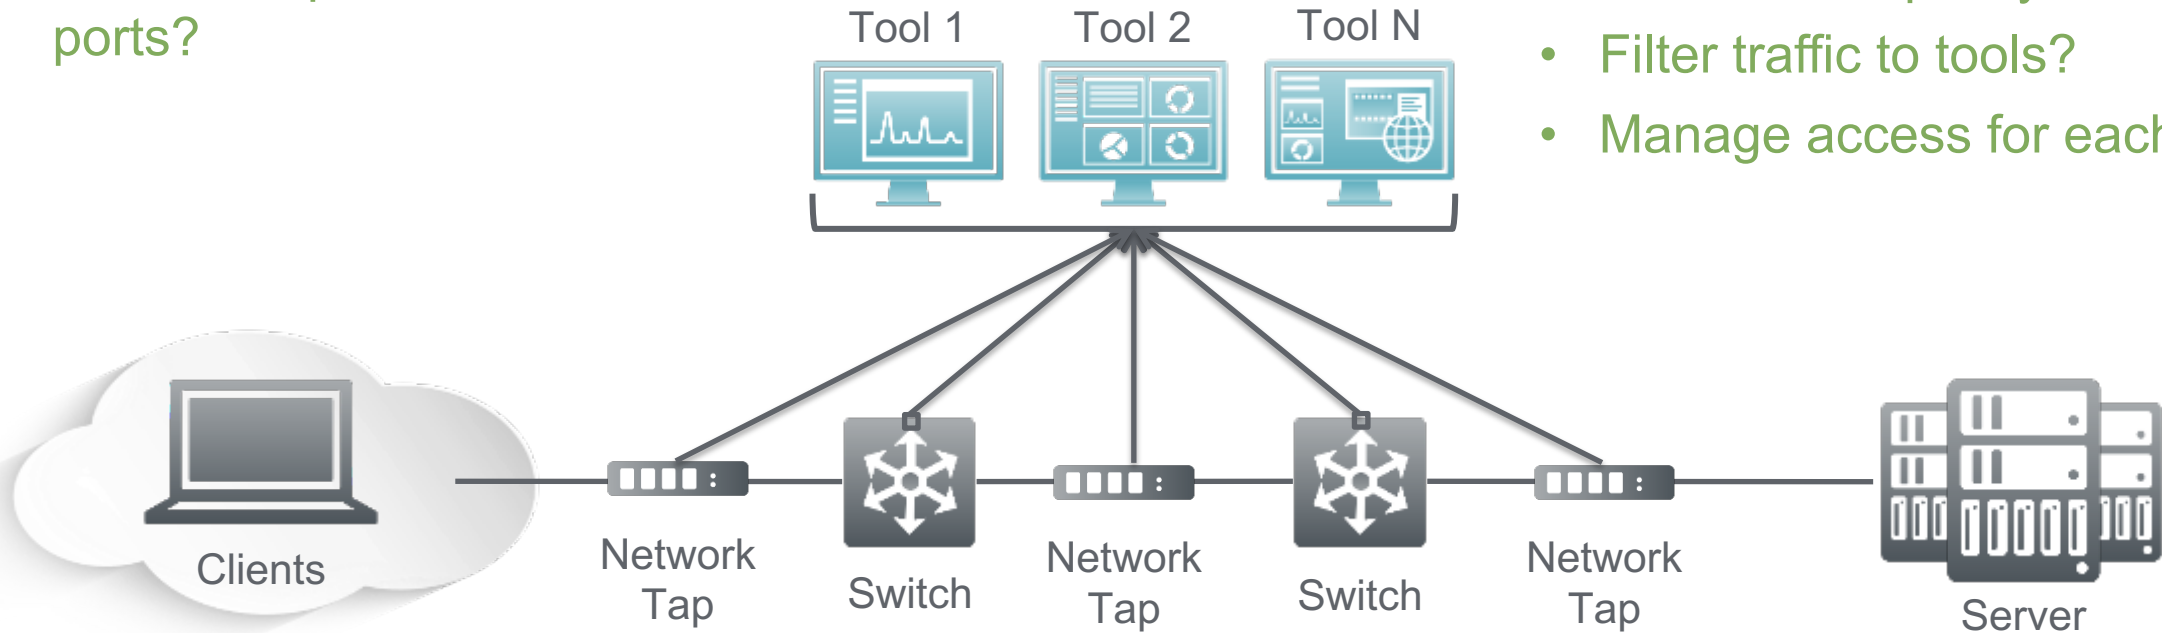

# ДОСТУП К ТРАФИКУ - ПРОБЛЕМЫ

## How to:

- Get data access for tools?
- Network taps instead of SPAN ports?

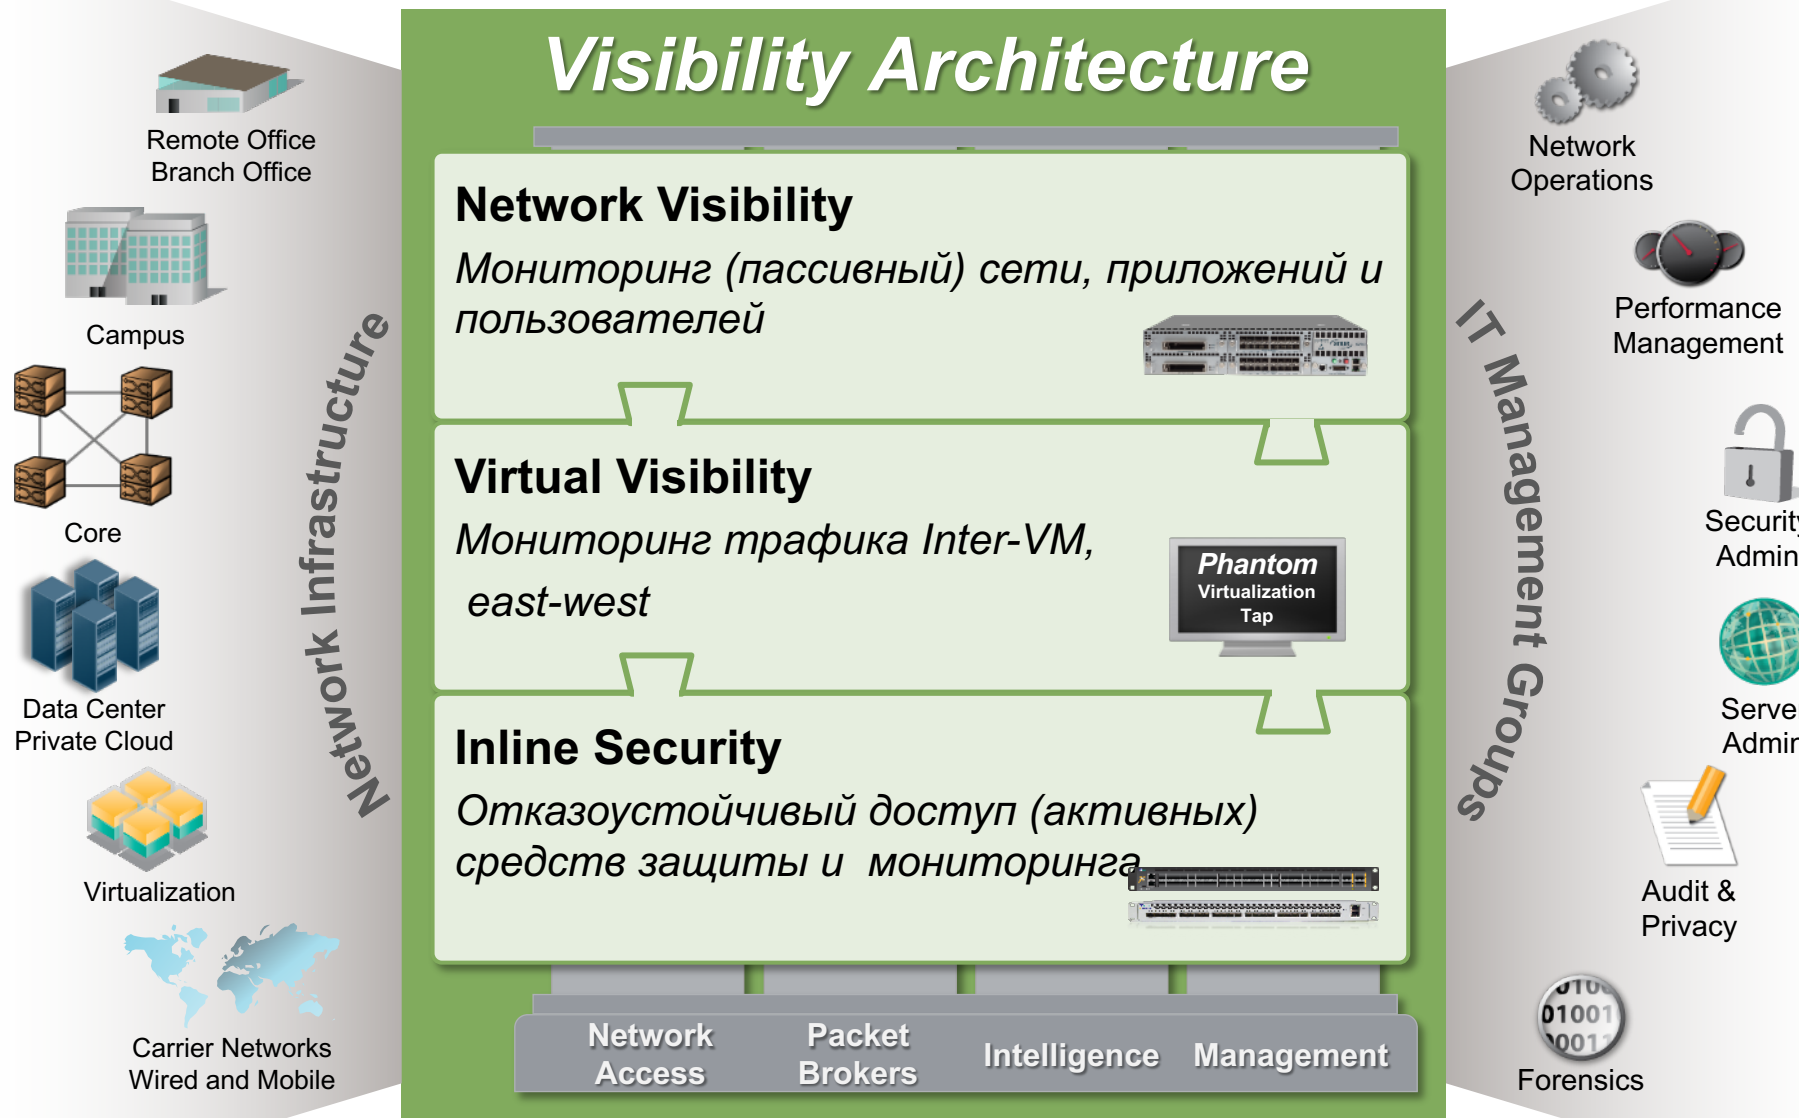

## How to:

- Deal with limited tool ports?
- Scale tool capacity?
- Filter traffic to tools?
- Manage access for each tool?

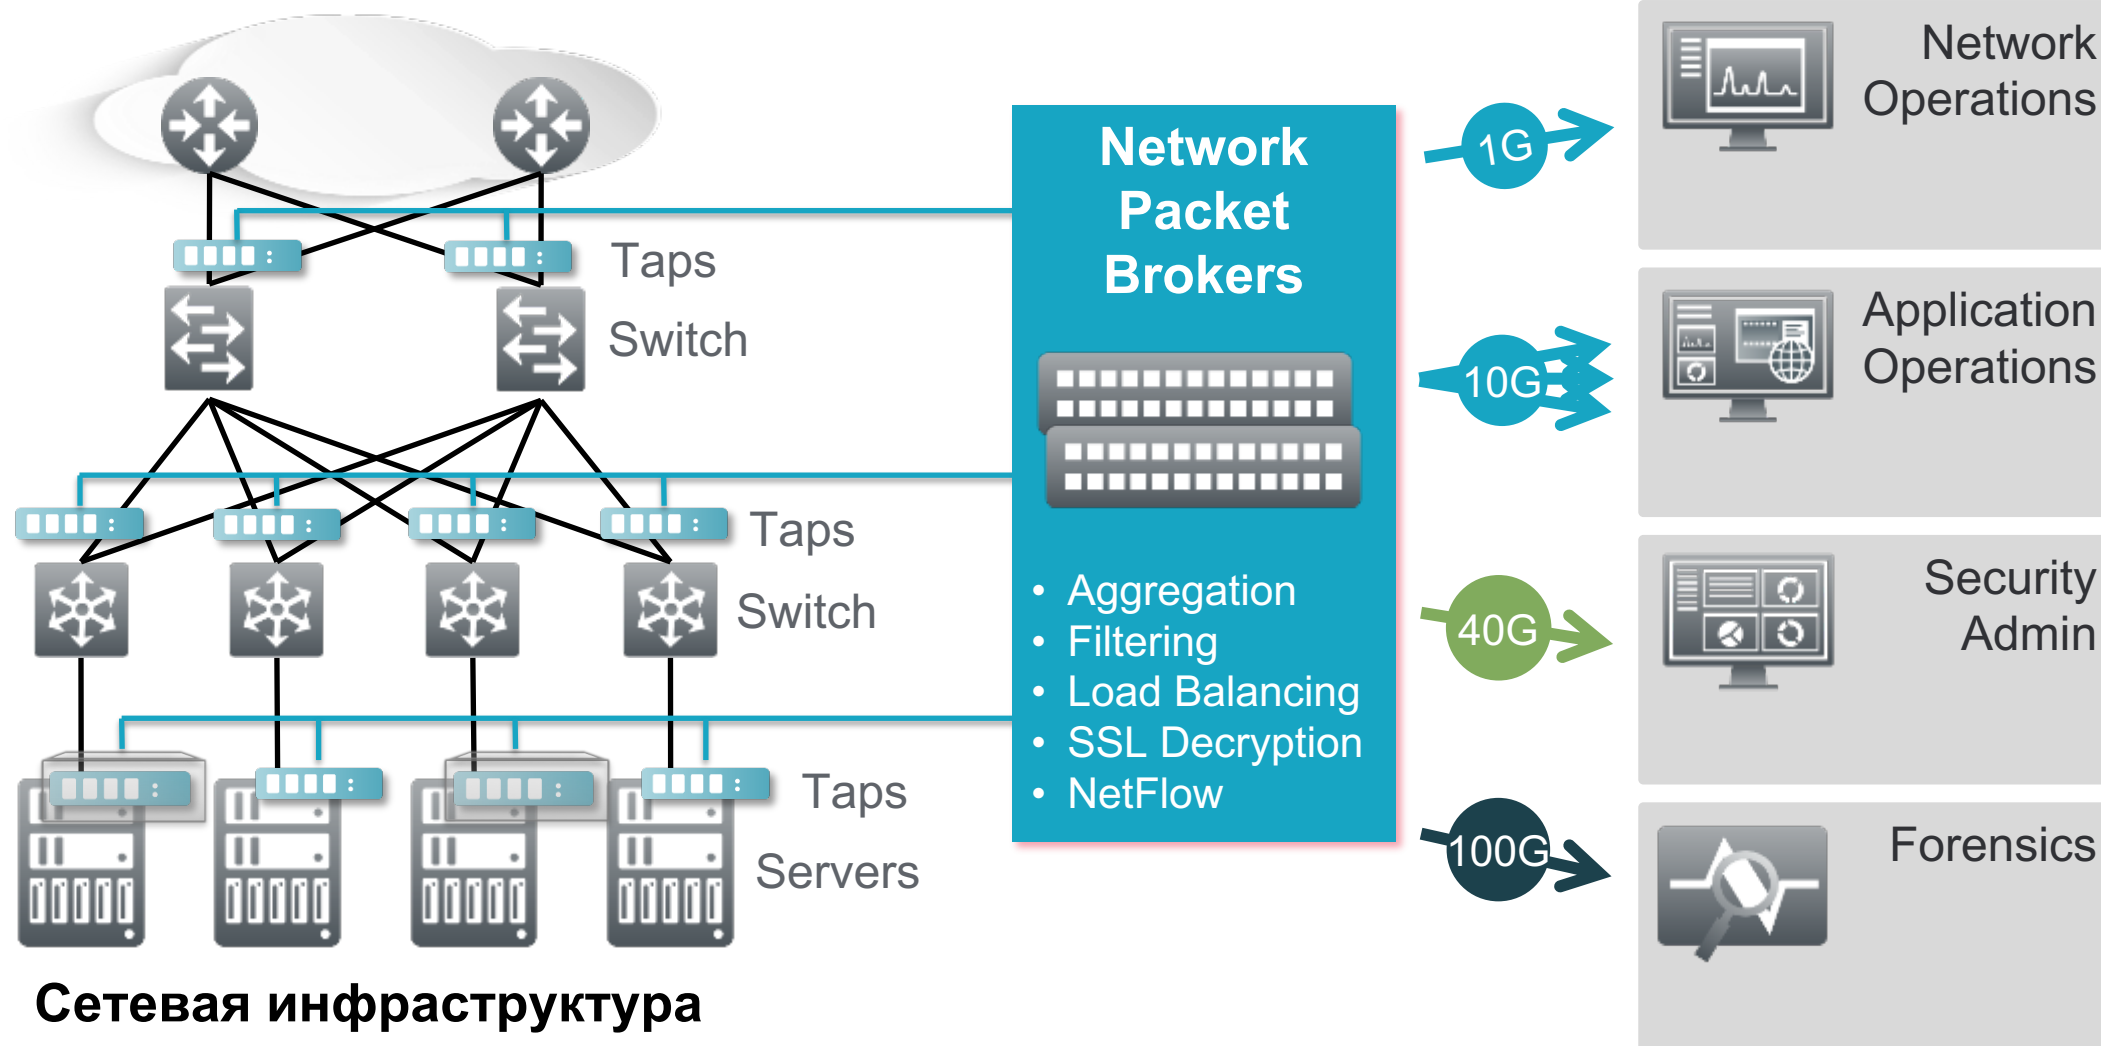

# АРХИТЕКТУРА ДОСТУПА

ОБЕСПЕЧЕНИЕ ПОЛНОГО ДОСТУПА К СЕТИ И ТРАФИКУ ПРИЛОЖЕНИЙ

# ПЛАТФОРМА ДОСТУПА К ТРАФИКУ

Доступ и распределение точка-точка

## Ixia Visibility Architecture

# ОБЗОР ОТВЕТВИТЕЛЕЙ СЕТЕВОГО ТРАФИКА

- Support for a variety of media and speeds
- Type of TAPs: network TAP, port aggregation TAPs, regeneration TAPs, link aggregation TAPs, BiDi (bidirectional) TAPs, and virtual TAPs

	Flex Tap	Copper Taps	Regen Tap	Aggregators
<b>Fabric</b>	Fiber	Copper	Copper & Fiber	Copper & Fiber
<b>Bandwidth</b>	1G to 100G	10/100/1000M	10M to 10G	10M to 10G
<b>Density</b>	LC model: 24 per 1U MTP model: 12 per 1U BiDi: 12 per 1U	3 per 1U	1 per 1U	Link Agg: 1 per 1U Port Agg: 2 per 1U
<b>Managed</b>	No	No	No	Yes – iTap and iLink Agg No – Non-I models
<b>Unique Features</b>	Low insertion loss multimode model	Zero Delay (battery)	Copper models support Inline or Span inputs	1G Memory buffer for traffic spikes Virtual Zero Delay

# OB3OP BYPASS

- Copper and Fiber Ports
- High availability Options

iBypass 10G

iBypass 3

iBypass 40-10 (4x10G)

iBypass VHD

iBypass HD

	iBypass 3	iBypass 10G	iBypass 40-10	iBypass HD	NEW! iBypass VHD
<b>Fabric</b>	Copper	Fiber	Fiber	Copper & Fiber	Fiber
<b>Bandwidth</b>	10/100/ 1000 Mbps	10 Gbps	4 x 10 Gbps	10/100/ 1000 Mbps	10Gbps
<b>Density</b>	1 per unit 8 per 1U	1 per unit 2 per 1U	4 per unit 8 per 1U	2 per line card 8 per 1U chassis	4 per line card 12 per 1U chassis
<b>HA Capable</b>	No	No	Active- Standby Active-Active	Active-Standby Active-Active	Active-Standby Active-Active Mixed HA support
<b>Managed</b>	Yes	Yes	Yes	Yes	Yes
<b>Unique Features</b>	<ul style="list-style-type: none"> <li>• High MTBF &gt;770k hours</li> </ul>	<ul style="list-style-type: none"> <li>• Ideal for distributed deployments</li> </ul>	<ul style="list-style-type: none"> <li>• Deploy with multiple inline tools</li> </ul>	<ul style="list-style-type: none"> <li>• Modular line cards</li> <li>• Independently controlled</li> </ul>	<ul style="list-style-type: none"> <li>• Modular line cards</li> <li>• Independently controlled</li> <li>• Flexible use of Bypass, Tap, Aggregation, &amp; Regeneration in single appliance</li> </ul>

# IBYPASS DUO – NEXT GEN. 10G IBYPASS

2 x Network Ports LR or SR  
4 x Monitor Ports

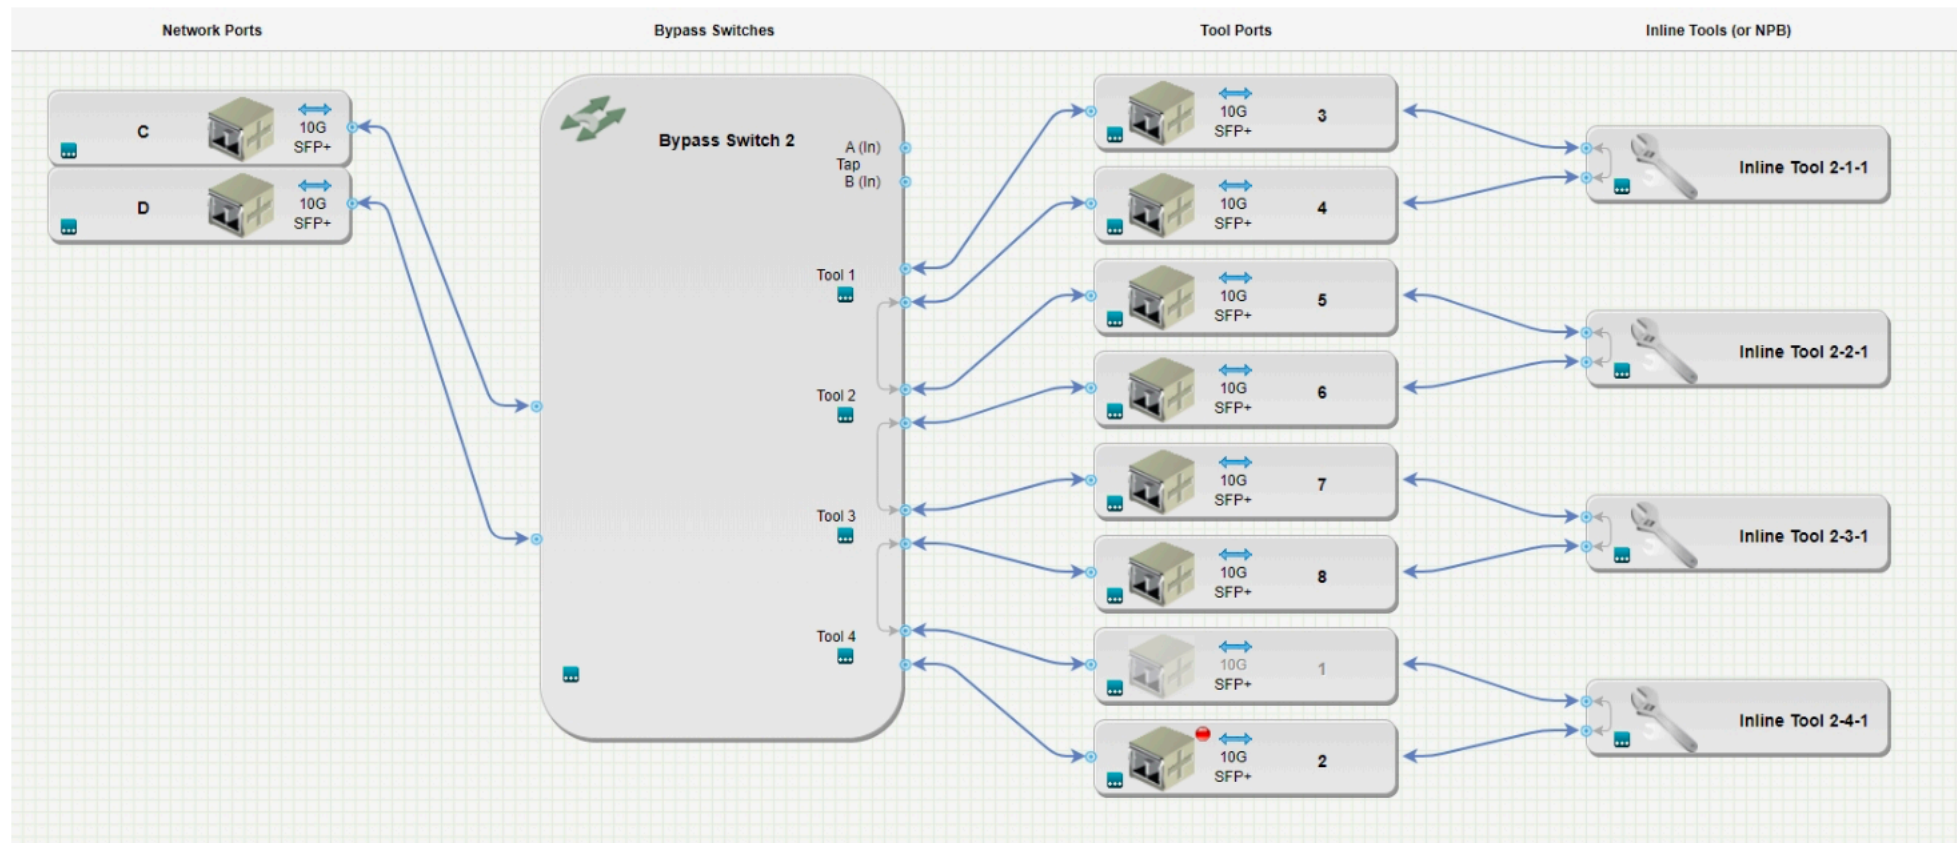

4 x Network Ports LR or SR  
8 x Monitor Ports

## Key Features

- 1/10G Bypass Switches
- Choice of Power Off – Fail Open or Fail Close – **Unique/Patent Applied for**
- Two management ports – **Unique**
- Best in class visual GUI
- Best in class Active/Active and Active/Passive Modes
- Cost effective solution for with and without NPBs

# ПРОСТОТА НАСТРОЕК

# IBYPASS 100G

## Failsafe inline protection

- ✓ Chassis Based – Up to 2 Modules
- ✓ Modules support 1 network segment and 1 tool segment
- ✓ Single Mode and Multi Mode Support
- ✓ QSFP28 on Tool Ports
- ✓ Choice of Power Off – Fail Open or Fail Close
- ✓ Configurable Heartbeats to detect tool failure
- ✓ Cost effective solution with and without NPBs

# БРОКЕРЫ СЕТЕВЫХ ПАКЕТОВ – СЕРИЯ VISION

NPBs at every level, capable of working together to create the best fit for a customers need, from microscale to hyperscale.

## Vision Edge 10S

48 ports of 1/10GE  
10GE copper support  
40Gbps of PacketStack  
Tunneling  
Inline mode  
NetFlow

## Vision Edge 40

10/40G Platform  
48 ports of 1/10GE  
6 ports of 40GE  
Aggregation  
Filtering  
Load Balancing

## Vision Edge 100

100G Platform  
6,4 Tbit Full Duplex  
32 ports of 40/100GE  
128 ports of 10GE  
Capable of (5) speeds  
- 10G, 25G, 40G, 50G  
Aggregation  
Filtering  
Load Balancing

## Vision ONE

Single site or campus  
1G/10G and 40G  
All-in-one solution for  
filtering and tools  
Full AFM (160G)  
AppStack/SecureStack  
Inline mode, Netflow  
SSL and future  
upgrade capability

## Vision 7300

Massive scale 3,8 Tbit  
All speed 1G to 100G  
Massive scale for  
packet processing in  
terabits/sec  
AppStack/SecureStack  
Inline mode, Netflow  
SSL and future  
upgrade

# SOFTWARE DEFINED MONITORING FOR THE SOFTWARE DEFINED NETWORKS

Vision Edge 1S

The Universal Monitoring Platform for the Edge

PACKET MONITORING

FLOW MONITORING

SYNTHETIC MONITORING

# VISION EDGE 1S

Distributed network packet broker probes for remote site visibility and performance monitoring

Branch Site

Packet

Capture remote packets  
Redistribute to data analytic tools

Branch Site

Flow

Generate NetFlow metadata  
Track utilization, top applications, top talkers, etc...

Branch Site

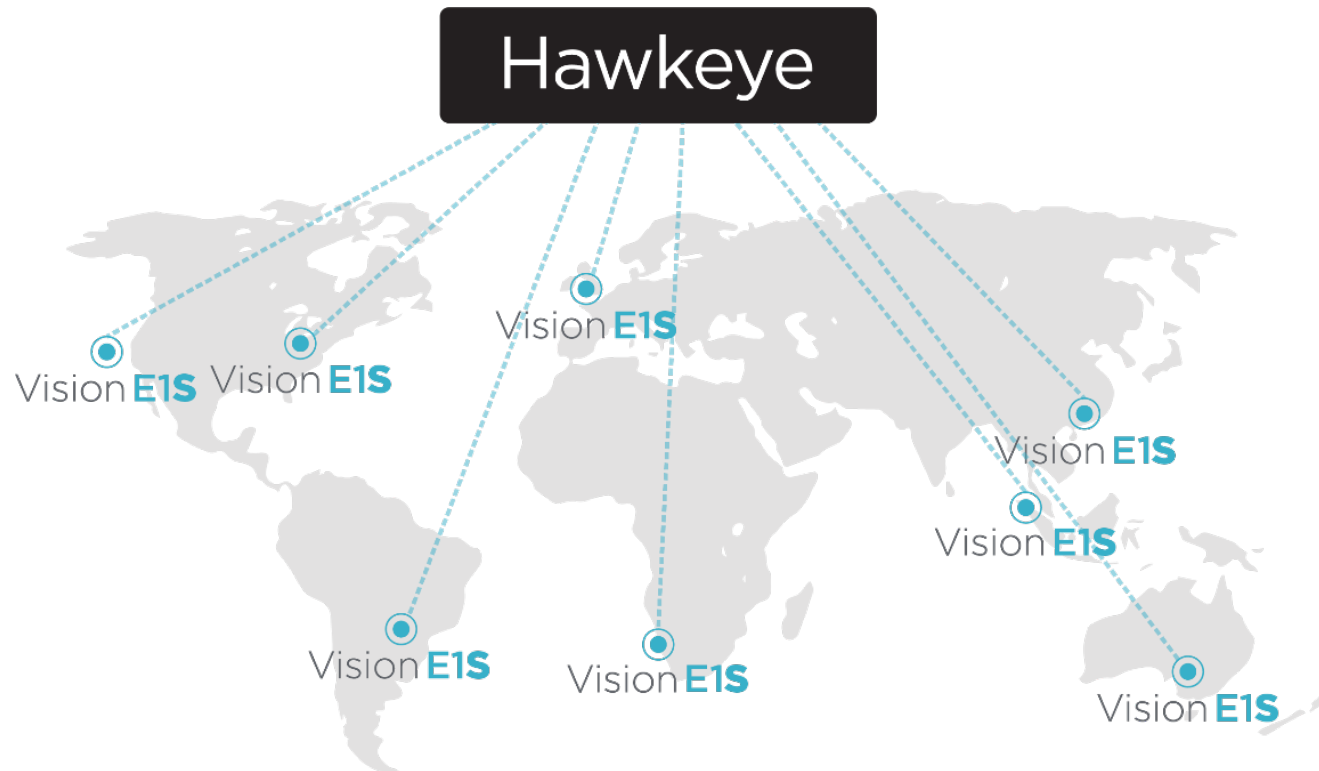

Synthetic  
Monitoring

Proactive monitoring for visibility & diagnostics on  
connectivity to cloud, internet and WAN, LAN

# BUILT-IN DISTRIBUTED MONITORING

## Central Management Server

### Hawkeye Controller

Cloud based or on Premise installation  
Controls Vision Edge 1S appliances  
One touch operations  
Real time dashboards and reports  
Historical trending

Built-in for remote management

# VISION EDGE 1S OVERVIEW

100% software based solution running on x86 appliance

# ВОЗМОЖНОСТИ ПАКЕТНЫХ БРОКЕРОВ

## Преимущества набора функций Stack

### AppStack

#### Context aware, signature-based application layer filtering

- Application filtering w/ optional RegEx
- Geolocation & tagging
- NetFlow & IxFlow
- Real-time dashboard

### PacketStack

#### Intelligent packet filtering, manipulation and transport

- Header stripping
- Timestamping
- Burst protection
- Protocol trimming
- Data masking
- Deduplication

### NetStack

#### Robust filtering, aggregation, replication, and more

- 3 stages of filtering
- VLAN tagging
- Load balancing
- Dynamic Filter Compiler
- Aggregation
- Replication

### SecureStack

#### Optimized handling for secure traffic

- Passive SSL decryption
- Threat insights
- Upcoming TLS 1.3 support
- Active SSL decryption
- Data Masking +
- Transparent proxy

# SECURESTACK

Powerful decryption and more

## SecureStack

- ✓ **Active SSL decryption**
- ✓ Passive SSL decryption
- ✓ Malicious activity detection
- ✓ No impact on other services
- ✓ Data masking +
- ✓ Threat insights

## Active SSL

- ✓ Decrypt once, inspect many
- ✓ Offload decryption from multiple tools
- ✓ 1-10 Gb SSL capacity
- ✓ Licensed-based performance upgrades
- ✓ Dedicated cryptographic processor
- ✓ Policy-based SSL inspection
  - Upcoming URL categorization
  - SSL parameters
  - Granular controls

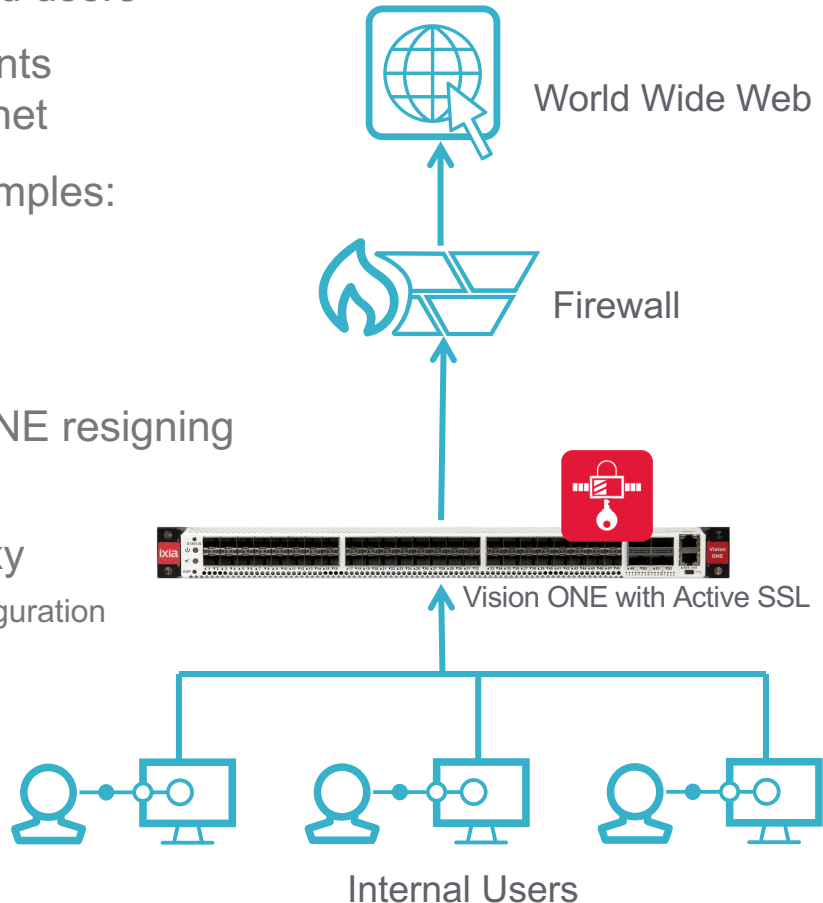

# ACTIVE SSL FOR INBOUND AND OUTBOUND

## FORWARD PROXY

[Click for details](#)

- Protects outbound users
- Sits between clients and firewall/Internet
- Security tool examples:
  - Antivirus
  - DLP
  - IDS/IPS
- Trusted Vision ONE resigning certificate
- Transparent Proxy
  - No browser reconfiguration

## REVERSE PROXY

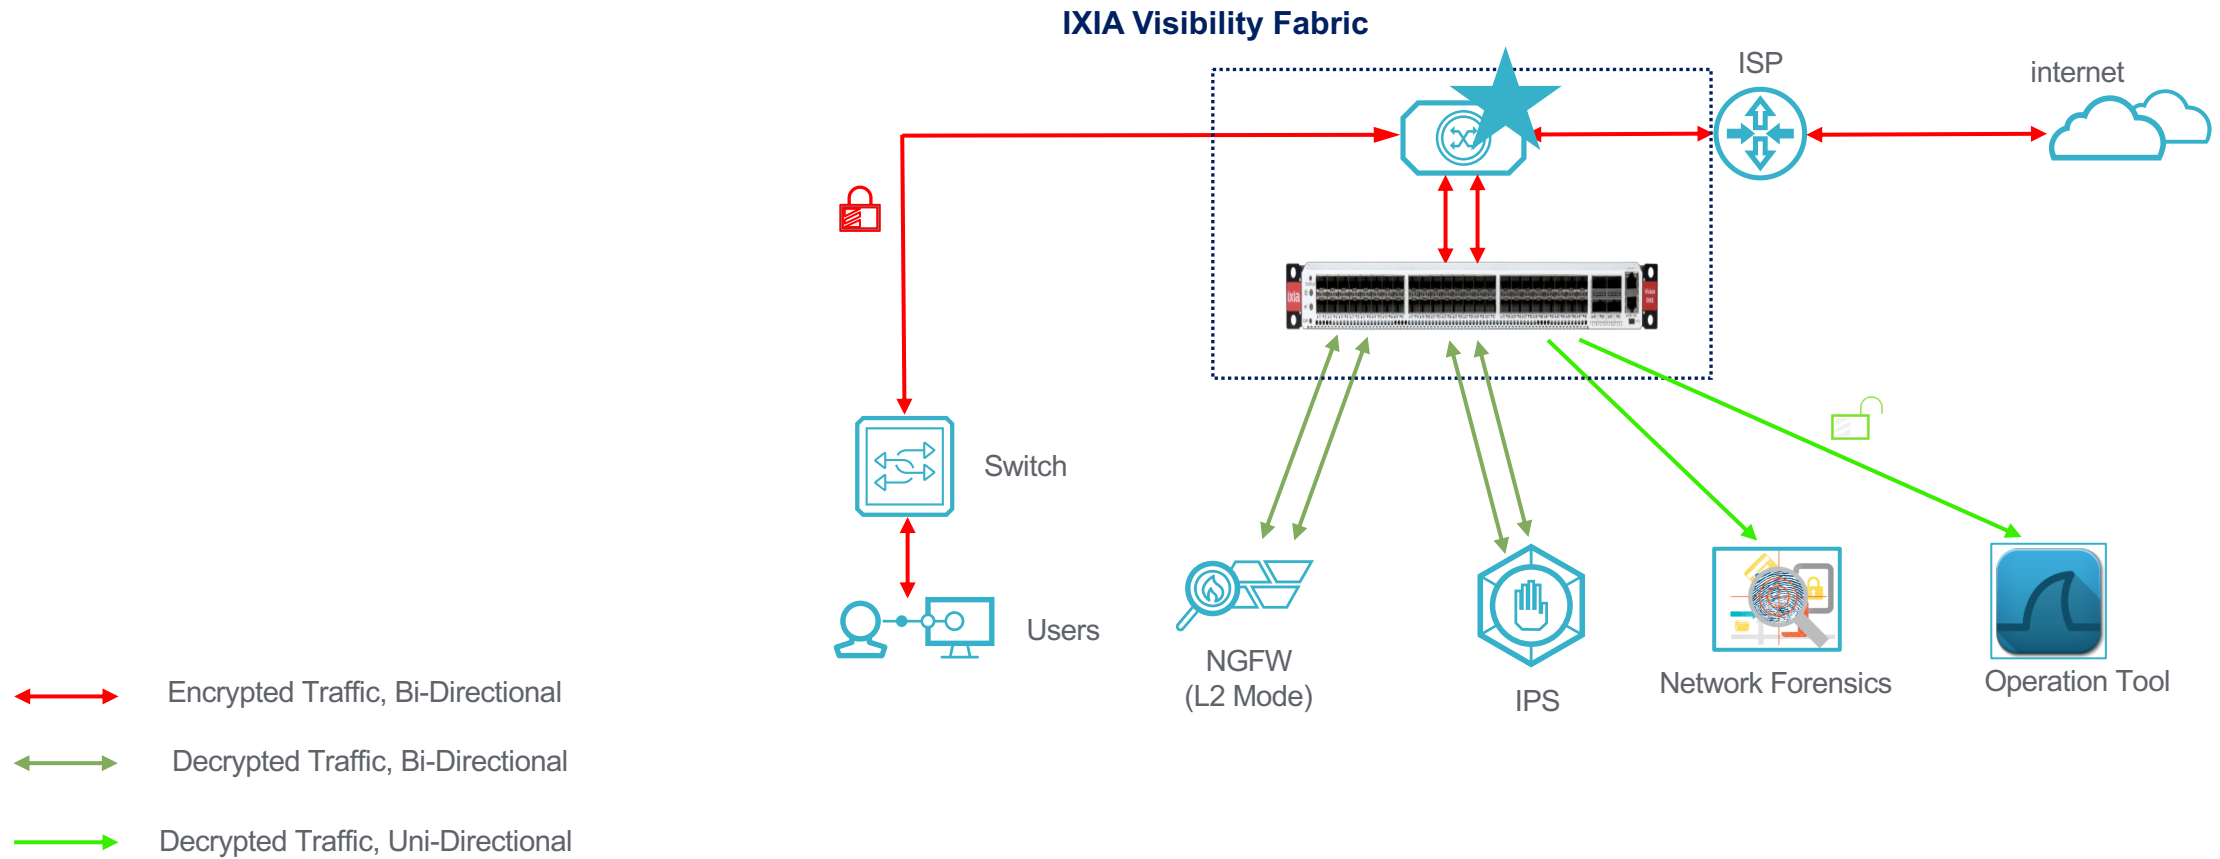

[Click for details](#)

- Provides service to servers
- Sits between servers and Internet
- Security tool examples:
  - WAF
  - IDS/IPS
- Transparent to users
- Reverse proxy signs with original Server Certificates

# FORWARD SSL PROXY SCENARIO

Standalone NPB, Active and Passive Tools for Single Link

# REVERSE SSL PROXY SCENARIO

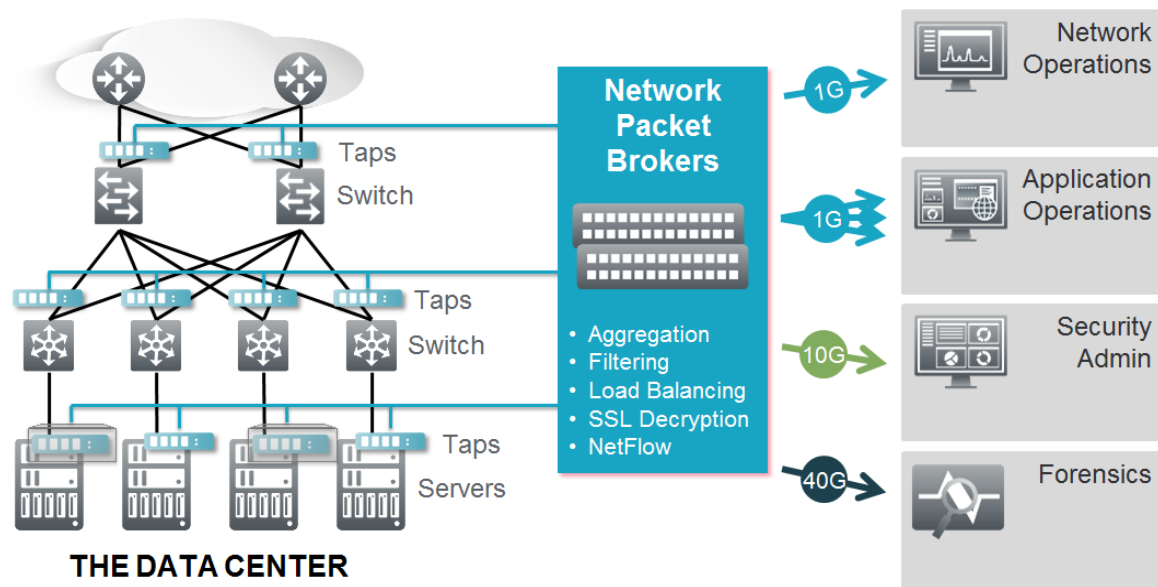

Standalone NPB, Active and Passive Tools for Single Link

# АРХИТЕКТУРА ДОСТУПА К ТРАФИКУ

Устранение слепых точек в сети

## Out-of-Band Framework

## In-Line Security Framework

# ОТКАЗОУСТОЙЧИВОСТЬ В РЕЖИМЕ INLINE

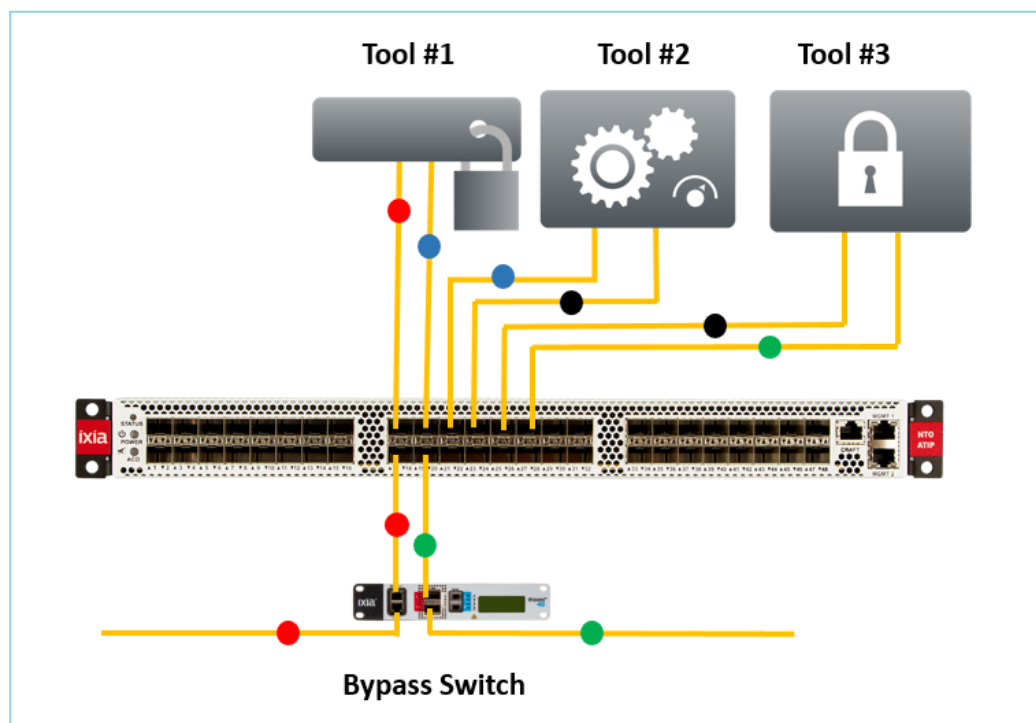

## Система IDS/IPS в режиме Inline:

- В случае выхода из строя IPS трафик прерывается:
  - > Нет связи на канале
  - > Нарушена работа Online Banking, Online Shopping, Online Trading и т.д.
  - > Высокое влияние на бизнес
- Высокие скорости требуют производительные инструменты безопасности и анализа:
  - > Возможность потери данных по причине высокой загрузки канала и низкой производительности инструментов
  - > Большие затраты на системы анализа и безопасности

# РАБОТА В РЕЖИМЕ INLINE

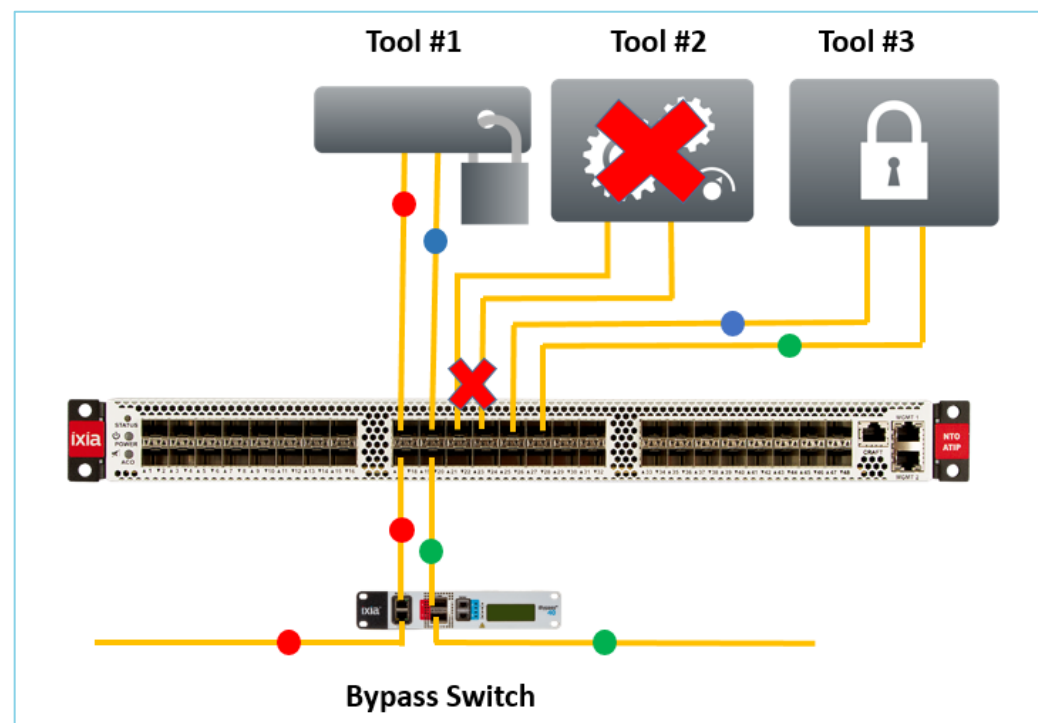

Инструменты анализируют и выборочно отбрасывают часть трафика или перенаправляют его обратно в сеть

## Normal Operation

- 3 different security tools are connected to each other in series.

## Tool #2 Failure

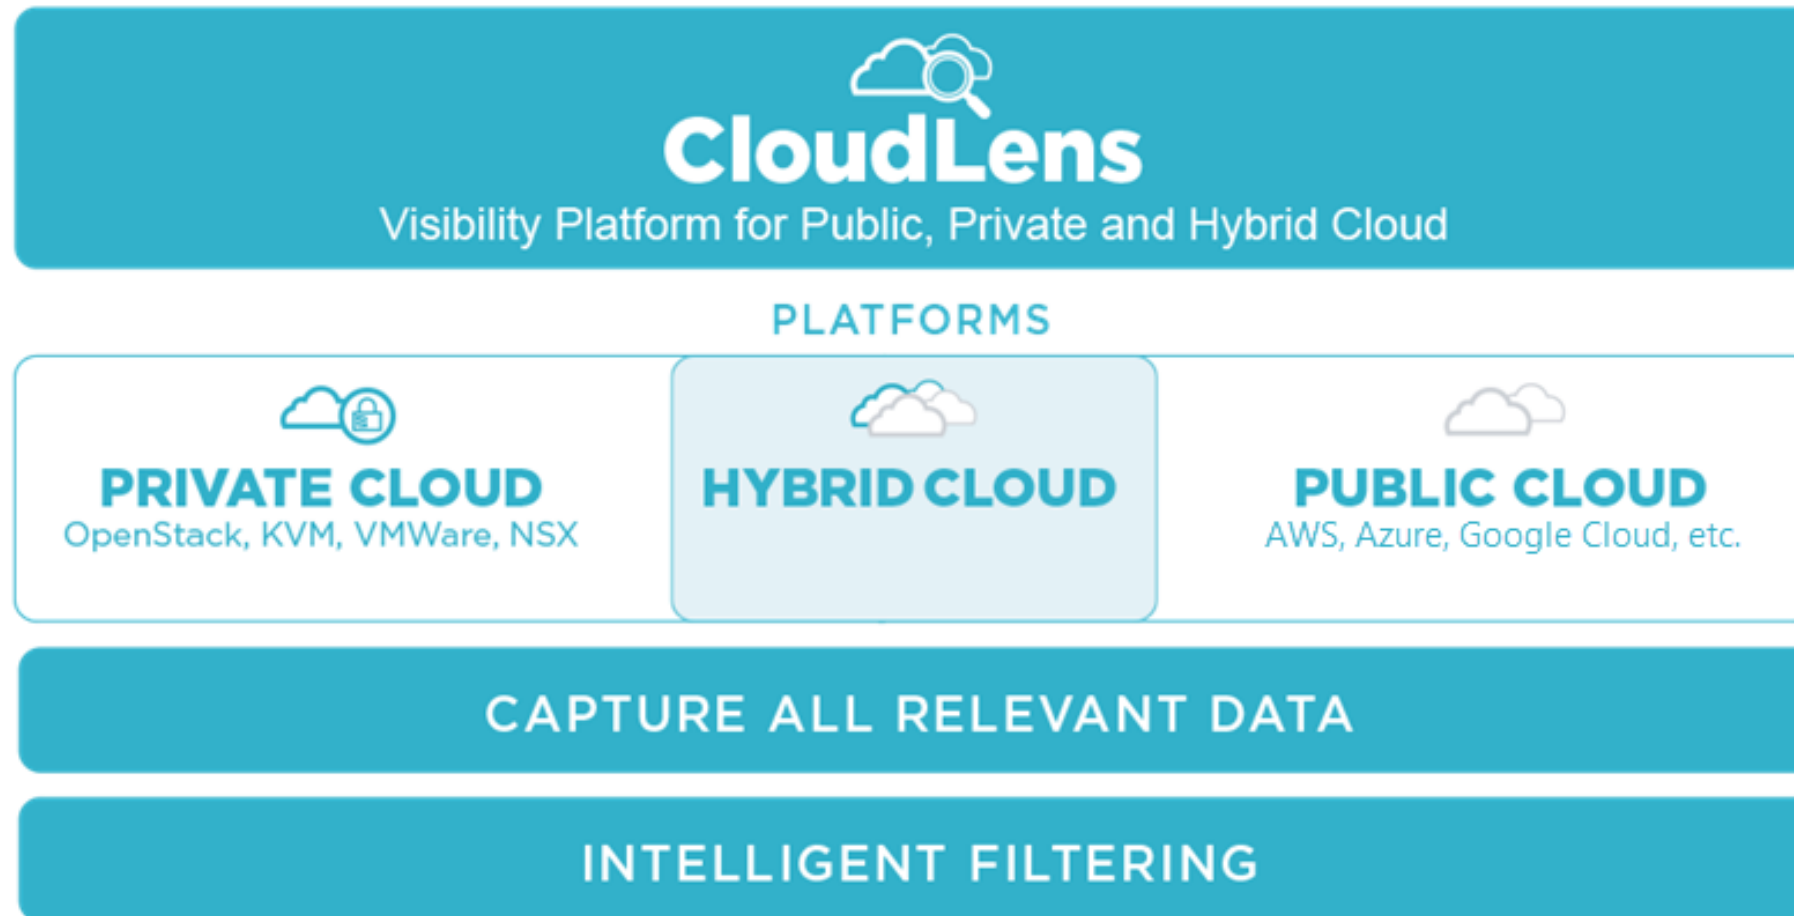

- If one or multiple tools fail traffic will be re-routed preventing that the working tool(s) are on fail as well.

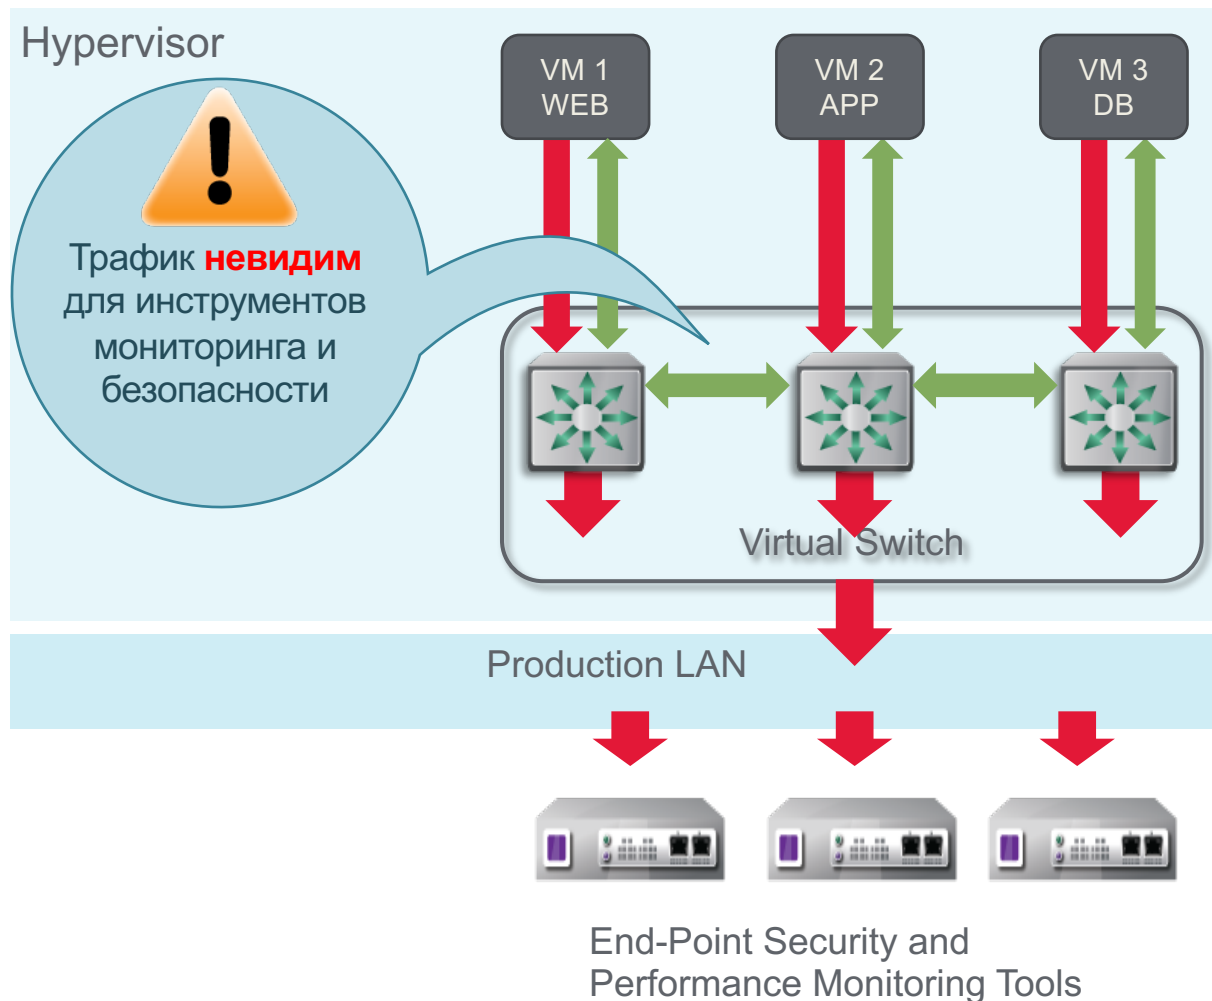

# CLOUDLENS

Видимость для всех облачных сред - публичных, частных и гибридных

# CLOUDLENS – ДОСТУП К ТРАФИКУ СРЕДЫ ВИРТУАЛИЗАЦИИ

Inter-VM – East-West Traffic Monitoring – No Blind Spots

## Virtual Traffic Visibility

- Provides Visibility into Data Center Network (Inline/ Out of Band)
- Inter-VM Traffic Monitoring
- Multiple Hypervisor Support (ESXi, KVM)
- vSwitch/Router Agnostic (VSS, vDS, OVS)
- GRE – VLAN – ERSPAN Protocols
- Monitoring Tool Agnostic
- Centralized Management
- **No changes to existing VNFs**

# ДОСТУП К ТРАФИКУ VIRTUAL EPC

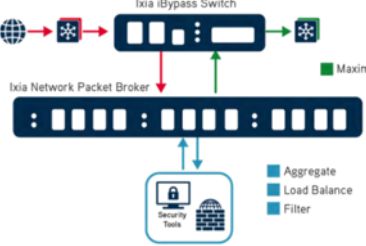

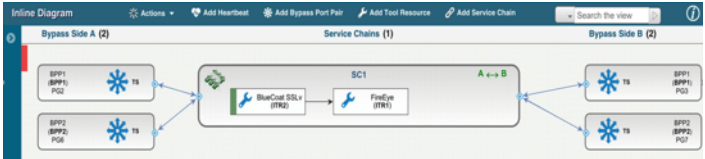

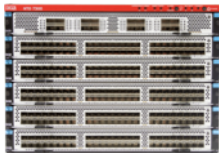

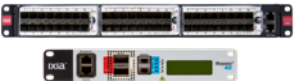

Фильтрация и выборка абонентского трафика

## Subscriber-aware visibility

- Filter and sample as close as possible to the source, allow virtual probes to scale
- Correlate GTP traffic for subscribers to always deliver traffic to same probe
- Includes Inter-VM Traffic Monitoring
- Works on both Physical and Virtual EPC
- Multiple Hypervisor Support (ESXi, KVM)
- vSwitch/Router Agnostic (VSS, vDS, Cisco Nexus)
- GRE Encapsulation and Decapsulation
- Monitoring Tool Agnostic
